

Orbit Determination Of Lro At

orbit determination, and in conjunction with the laser altimeter (LOLA) at 10 cm accuracy is expected to provide the position of LRO and, by inference, the position of surface features to the desired accuracy.

Orbit Determination of LRO at the Moon - NASA

The Lunar Reconnaissance Orbiter (LRO) has been orbiting the Moon since 2009, obtaining unique and foundational datasets important to understanding the evolution of the Moon and the Solar System. The high-resolution data acquired by LRO benefit from precise orbit determination (OD), limiting the need for geolocation and co-registration tasks. The initial position knowledge requirement (50 m) was met with radio tracking from ground stations, after combination with LOLA altimetric crossovers ...

Orbit determination of the Lunar Reconnaissance Orbiter ...

Orbit determination of the Lunar Reconnaissance Orbiter: Status after Seven Years. Planetary and Space Science, under review. Planetary and Space Science, under review. The LRO trajectory is processed over short spans (typically 2.5 days) and combined into month-long batches.

PGDA - Trajectory of LRO

LRO orbit determination or "phases", each lasting for approximately one lunation (28 days). In the time period presented here (13 July 2009

Orbit determination of the Lunar Reconnaissance Orbiter

Precise point positioning (PPP) with real-time orbit and clock correction streams has become an established technique over the past decade. Several free as well as commercial sources of precise correction streams are available through the internet or via a satellite link to geostationary satellites.

Orbit determination of LEO satellites : GPS World

Precise orbit determination of the Lunar Reconnaissance Orbiter has been conducted. • A lunar gravity field based on Doppler range-rates to LRO is presented.

Orbit determination and gravity field recovery from ...

Precise Orbit Determination of Low Earth Orbiting Satellites for Climate Applications Including an Uncertainty Estimation Approach Josef Innerkofler , Wegener Center for Climate and Global Change (WEGC) and Institute for Geophysics, Astrophysics and Meteorology/Institute of Physics, University of Graz, Graz, Austria; FWF-DK Climate Change, University of Graz, Graz, Austria

LPS19 - Precise Orbit Determination of Earth Observation ...

The Lunar Reconnaissance Orbiter (LRO) is the first spacecraft in interplanetary space routinely tracked with 1-way optical laser ranges. Therefore, the mission is a suitable testbed to ...

Orbit Determination of LRO at the Moon - ResearchGate

mission, when LRO flew in a low circular orbit, orbit determination requirements were met nearly 100% of the time. When the extended mission began, LRO returned to a more elliptical

LUNAR RECONNAISSANCE ORBITER ORBIT DETERMINATION ACCURACY ...

We present the results on precision orbit determination from the radio science investigation of the Lunar Reconnaissance Orbiter (LRO) spacecraft. We describe the data, modeling and methods used to achieve position knowledge several times better than the required 50–100 m (in total position), over the period from 13 July 2009 to 31 January 2011. In addition to the near-continuous radiometric tracking data, we include altimetric data from the Lunar Orbiter Laser Altimeter (LOLA) in the form ...

Orbit determination of the Lunar Reconnaissance Orbiter ...

Precise Orbit Determination for Low Earth Orbit Satellites David Hobbs (hobbs@tele2adsl.dk) and Preben Bohn (prb@terma.com) Terma A/S, Space, Vasekær 12, 2730 Herlev, Denmark

Precise Orbit Determination for Low Earth Orbit Satellites

Vasile, M., Torre, F., Serra, R., & Grey, S. (2017). Autonomous orbit determination and navigation for formations of CubeSats beyond LEO. Paper presented at 9th ...

Autonomous orbit determination and navigation for ...

123 LRO orbit determination 195 or “phases”, each lasting for approximately one lunation atic because they usually provide the strongest control of the (28 days). In the time period presented here (13 July 2009 spacecraft orbit (Table S2). Early in the mission, the Doppler to 31 January 2011), there are 21 phases in total. Commis- data collected by the White Sands station were time-biased ...

Orbit determination of the Lunar Reconnaissance Orbiter

Bauer S, Hussmann H, Oberst J, Dirkx D, Mao D, Neumann G, Mazarico E, Torrence M, McGarry J, Smith D, Zuber M (2016) Demonstration of orbit determination for the Lunar Reconnaissance Orbiter using one-way laser ranging data.

Assessment of the impact of one-way laser ranging on orbit ...

Proceedings of the 16th International Workshop on Laser Ranging 85 Orbit Determination of LRO at the Moon David E. Smith, Maria T. Zuber, Frank G. Lemoine, Mark H. Torrence,

Orbit Determination of LRO at the Moon - cdis.nasa.gov
