Mellapak is the most widely used structured packing worldwide. MellapakPlus™ is the latest generation of structured packing. With the enhancement of the geometric structure of conventional Mellapak™, the pressure drop is much lower and the maximum capacity can be extended by 50% compared to Mellapak™.

Abstract: The accumulation of ash in diesel particulate filters is an important factor limiting the filter's service life, increasing its pressure drop and having an adverse effect on fuel economy.

Ash Accumulation in Diesel Particulate Filters

7.2.3 Porous Media Conditions. The porous media model can be used for a wide variety of single phase and multiphase problems, including flow through packed beds, filter papers, perforated plates, flow distributors, and tube banks.

Introduction. Asian pears comprise a large group of pears that are crisp in texture and, when mature, are good to eat as soon as harvested or for several months after picking if held in cold storage.

Asian Pears - Fruit & Nut Research & Information Center

A weather front is a boundary separating two masses of air of different densities, and is the principal cause of meteorological phenomena outside the tropics.

Weather front - Wikipedia

North Carolina is a U.S. state located on the Atlantic Seaboard in the southeastern United States. Tropical cyclones—storms characterized by a large low-pressure center and numerous thunderstorms that produce strong winds and heavy rain—regularly affect the state.

List of North Carolina hurricanes (2000-present) - Wikipedia

Table 2. Handling hazards expressed as a probable drop height for different package sizes and weights. Although drop heights will vary according to the distribution network used, they provide a reasonable estimate of risk that is only occasionally attained or exceeded (Brandenburg 1991).
